Instructions to Refurbish Your EPSON Ink Maintenance Tank

Be sure to have ONE spare maintenance tank on hand.

When the control panel on your printer instructs you to change the tank, remove full tank and replace it with a spare tank. Be sure to save your original box and plastic bag. With a knife, letter opener, or small screwdriver, POP off the TOP plastic cage on the tank by prying gently. It snaps out very easy! Set aside & save this.

Turn the tank over a plastic grocery bag or newspaper and tap on the back to dislodge the absorbent filler that is full of ink or pry out ink filled filler with screwdriver. Wrap up and dispose of the ink filler. This saves you money in shipping the tank back to us.

The ink inside the tank can be rinsed out, or just bag the tank with the top cage. Place in Epson box with your address on it and return to us for cleaning and re-programming the chip. **We will insert a NEW filler into the maintenance tank and re-program the tank.**

We will return your EPSON ink maintenance tank ready to use! It's that easy! 303 934-2777

Be sure to purchase our service online at www.digital2you.cc or enclose \$24.95 which includes return shipping & handling. MAIL YOUR TANK with Invoice Order ID # or check along with your return address to:
